The American Academy of Medical Acupuncture is pleased to announce another offering of an exciting education opportunity — a workshop focused on advanced training for producing results for patients with pain and sports medicine issues.

Beyond the use of medical acupuncture alone, other acupuncture related techniques have been developed in the distant and recent past that have important applications for pain and sports medicine. These therapies are commonly taught and practiced by acupuncturists globally, though often ignored within the training and education of medical acupuncture within the USA. At times, these acupuncture related techniques will enhance the clinical recovery well beyond the use of medical acupuncture alone.

Many physicians in the AAMA have a solid basic training and education in medical acupuncture, but there is a continuing need for advanced training, especially when medical acupuncture alone does not produce the results needed for their patients with pain and sports medicine issues. This workshop is designed to take the practitioner into various acupuncture related techniques that will enhance their clinical outcomes for these patients.

Dr. Bryan L. Frank will present information in this 2-day workshop based on many years of teaching medical acupuncture and related techniques for pain, sports medicine and other functional medicine indications. Planning of this workshop was based on the years of teaching techniques along with feedback from seminar and congress evaluations to meet attendees needs and wishes for enhanced clinical treatment options for their patients.

All medical acupuncturists who desire to see greater clinical success in their pain and sports medicine clientele should consider attending the seminar. No further prerequisites are required for licensed medical practitioners.

Attendance is limited to 35 participants.

**ACCREDITATION:**
The American Academy of Medical Acupuncture is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. The American Academy of Medical Acupuncture designates this live activity for a maximum of 13 AMA PRA Category 1 Credits™. Physicians should only claim credit commensurate with the extent of their participation in the activity.

**The workshop(s) will be held as follows:**
June 8-9, 2013
Hyatt Regency O'Hare
3900 Bryn Mawr Avenue
Rosemont, IL
Phone: 888-421-1442

The schedule for the workshop will be as follows:
Saturday 8:30 am - 5:00 pm
*There will be a 15 minute break each morning and afternoon and a one and hour and a half lunch period (lunch is not included – participants are on their own for lunch).
Sunday 8:00 am - 4:30 pm

**REGISTRATION**
Attendance is limited to thirty five participants in order to provide the optimum learning experience. Complete the attached registration form and mail it to the Academy’s office at AAMA, 1970 E. Grand Ave, Ste 330, El Segundo, CA 90245 or fax to 310-364-0196.

You can also register and pay online: www.medicalacupuncture.org

Registrations will be accepted in the order received until the course is full at 35 participants. After the course is full, you will be notified and your fee returned, or you may go on the ‘wait list’ should there be a cancellation.

To avoid missing out, you should send in your registration and make a room reservation as soon as possible. Each participant is responsible for his or her own travel and hotel expenses. Registrations will be accepted on a first come, first served basis.

**REASONS FOR A PHYSICIAN TO ATTEND:**
Medical acupuncture practitioners often have seen significant advantages to the incorporation of acupuncture within their biomedical practices. However, all practitioners have also found some patients for which medical acupuncture alone does not resolve the patients’ complaints. Acupuncture Related Techniques may often lead a physician to interventions that result in success of healing and regeneration of injuries and thus lead to freedom of pain and sports medicine issues.

**LEARNING OBJECTIVES:**
Beyond the use of medical acupuncture alone, other acupuncture related techniques have developed in the distant and recent past that have important applications for pain and sports medicine. These therapies are commonly taught and practiced by acupuncturists globally, though often ignored within the training and education of medical acupuncture within the USA. At times, these acupuncture related techniques will enhance the clinical recovery well beyond the use of medical acupuncture alone.

The overall objectives for physicians attending the Workshop are to be able to:
• Review the development and application of cupping, scraping and moxibustion in pain and sports medicine.
• Review the development and application of acupuncture micro-systems in pain and sports medicine.
• Review the theories and indications of Neural Therapy in treating pain and sports medicine.
• Review the theories and indications of Prolotherapy in treating pain and sports medicine.
• Become acquainted with various clinical syndromes and paper cases from actual clinical settings as examples of a comprehensive approaches to pain with acupuncture related techniques.
