INTRODUCTION

The American Academy of Medical Acupuncture is delighted to present a symposium designed to explore the mechanisms and applications of acupuncture from diverse perspectives. This meeting addresses topics specifically suggested by practitioners, and expands on many different approaches for addressing practical clinical problems. An emphasis on evidence-based, scientific research is integrated with classical and modern protocols for the serious clinician. Surveys and evaluations from previous symposia have indicated that there is a strong desire for information about acupuncture techniques that honor the rich history of Asian medicine, while applying this to contemporary Western medical practice. This symposium explores just that, while providing the preeminent opportunity for networking among medical professionals working in this rich and expanding field.

The wide variety of styles and topics covered in this year’s symposium include: auricular acupuncture; women’s reproductive health/ menopause; evolutionary biology; musculo-skeletal/chronic pain; pulse diagnosis; men’s health; herbal medicine; extraordinary vessels; family medicine pearls; constitutional facial acupuncture; allergy auriculotherapy; electroacupuncture for chronic pain conditions; acupuncture implementation; and research methodology.

This symposium will present multi-faceted approaches for understanding, appreciating, and applying acupuncture in today’s practice. It will expand awareness of the scientific research into the effects of acupuncture, while enhancing understandings of classical wisdom. It will help clinicians apply the medicine both towards direct patient care, and in overcoming care delivery challenges.

WHO SHOULD ATTEND?

The Symposium is designed for instruction and training of health care professionals interested in, or already practicing, acupuncture. Medical practitioners with no experience as well as those with extensive backgrounds in acupuncture will find the program useful to their medical practices.

The Pre-Symposium workshops are intended to provide a more concentrated learning experience where faculty can spend the entire day focusing on a topic in greater depth, and with more time for practical examples from clinical experiences.

CONTINUING EDUCATION CREDITS

ACCREDITATION

The American Academy of Medical Acupuncture is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

The American Academy of Medical Acupuncture designates this live activity (Symposium) for a maximum of 22 AMA PRA Category 1 Credit(s)™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

The American Academy of Medical Acupuncture designates this live activity (each Pre-Symposium workshop) for a maximum of 7.5 AMA PRA Category 1 Credit(s)™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

CEUS

PDA credits pending from NCCAOM; NCCAOM PDA Provider #173327.

Learning objectives for physicians attending the Symposium General Sessions. Physicians will be able to:

• Expand understandings of the channel systems, and apply this knowledge to both the treatment of disease and to broaden understandings of human growth and development;

• Identify barriers and opportunities to the incorporation of acupuncture into existing medical practices, and recognize critical points in developing new practice models for acupuncture delivery;

• Appreciate the evidence base for acupuncture, qi gong, and herbal medicine, applying to certain patient conditions;

• Recognize acupuncture’s role in treating acute and chronic pain syndromes of many types, and apply to various clinical cases;

• Utilize microsystems of acupuncture for the treatment of a wide variety of conditions, including allergies;

• Review the modern evidence base for acupuncture’s mechanisms of action, and recognize how these mechanisms interface with classical and modern treatment strategies.

PRE-SYMPOSIUM WORKSHOP I

Existential Crises, Mood Disorders and the 8 Extras

Workshop led by Yvonne Farrell, DAOM, LAc. The workshop will explore the archetypal nature of the 8 Extraordinary Vessels. These jing vessels support growth, development and our capacity to adapt in the face of change. The 8 extras fund the evolution of consciousness.

Learning Objectives. At the end of this workshop, attendees will be able to:

• Support mental health with the 8 Extraordinary Vessels;
• Recognize pathology in each vessel;
• Review points, pathways and functions for each vessel;
• Create simple and effective treatments using the 8 Extraordinary Vessels for psycho-emotional imbalances.

PRE-SYMPOSIUM WORKSHOP II

Principles and Practice of Auricular Acupuncture

Workshop led by Nader Soliman, MD, FAAMA. This workshop will introduce attendees to the history of utilizing the ear for treatment in different cultures throughout history until the full discovery of the auricular acupuncture microsystem by the French physician Dr. Paul Nogier in the 1950’s. Attendees will gain knowledge on the auricular somatotopic presentation of the various organs and structures as introduced by Dr. Paul Nogier. The somatotopic presentation is known as the inverted fetus presentation. Attendees will also be introduced to the modified presentation known as Chinese ear acupuncture.

An in depth study of the inverted fetus presentation as introduced by Dr. Paul Nogier and its relevance of being incorporated into the daily practice of physicians to help with diagnostic techniques and help offering additional options for the treatment of energetic and pathological conditions on the somatic, emotional, and psychological spheres.

Attendees will be introduced to the evolution of the auricular acupuncture microsystem since its introduction. The principles of the three-phase auricular acupuncture microsystem and the highly sophisticated auricular medicine system will be discussed.

Learning Objectives. At the end of this workshop, attendees will be able to:

• Describe the history and the evolution of the auricular acupuncture microsystem;
• Integrate the practice of auricular acupuncture with the practice of body acupuncture;
• Utilize the auricular acupuncture microsystem as an independent treatment approach;
• Utilize the auricular acupuncture and microsystem to help with the diagnosis and the treatment of various medical conditions facing the practitioners on a daily basis;
• Explore utilizing the acupuncture microsystem for acupuncture and medical research.

PRE-SYMPOSIUM WORKSHOP III

Balance System Acupuncture: Single Systems Balancing

Workshop led by Sonia Tan, DAOM, RAc, RTCMP. This workshop provides the basic foundations of five main systems of Balance System Acupuncture, an evolution of Balance Method. The systems are rooted in the concept of healing the body by balancing meridians.

Students will learn the history of the Balance Method/System, the basis of each of the Five Systems, and the logical processes for determining the meridians to acupuncture, including an easy-to-use format to outline the treatment plan. Learn how to apply the quick, efficient results effectively! Particular attention will be paid to musculo-skeletal conditions in this introductory level.

Learning Objectives. At the end of this workshop, attendees will be able to:

• Contextualize the Balance Method/System within the history of the acupuncture field;
• Outline the development of the six systems/strategies;
• Identify the name and numbers of the six systems/strategies and describe how each balances a meridian;
• Apply a mirror and imaging concept to choose the acupuncture points on the body;
• Locate specific acupuncture points within the Balance System;
• Outline and follow the steps used in the Balance System to diagnose and treat health conditions;
• Diagnose which meridians are sick and apply a treatment plan.

PRE-SYMPOSIUM WORKSHOP IV

Constitutional Facial Acupuncture: The New Protocols

Workshop led by Mary Elizabeth Wakefield, LAc, MS, MM. This workshop in Constitutional Facial Acupuncture introduces the use of gentle origin/insertion techniques for facial needling to address muscle imbalances related to emotional expression. The Jing, Ying and Wei levels of treatment, along with specialized “Shen” scalp points, address underlying constitutional and psychospiritual imbalances. The application of topical Chinese herbs further enhances the results of the facial needling. A full demonstration of the protocol will be provided.

Learning Objectives. At the end of this workshop, attendees will be able to:

• Facial acupuncture protocols based upon origin/insertion acu-muscle techniques;
• Three types of constitutional treatments – Jing, Ying and Wei levels;
• Psychoemotional “Shen” scalp points;
• A topical Chinese herbal treatment protocol to enhance the results of the facial needling.
